🎯 Projects

– Learning App

The Learning App is an interactive educational platform developed using Java and JavaFX. It features engaging quizzes, comprehensive progress tracking, and secure user authentication to enhance the learning experience for students. One of the main challenges addressed during development was designing an intuitive and accessible user interface that caters to a diverse range of learners with varying technical backgrounds.
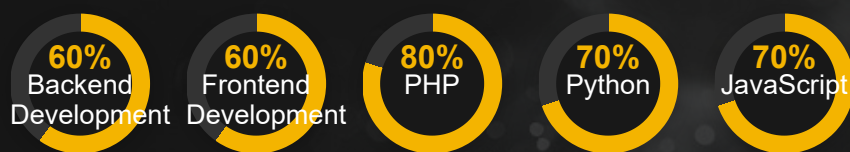

– Online Shopping Platform

The Online Shopping Platform is a dynamic e-commerce website built with PHP, MySQL, and JavaScript. It enables users to browse products, manage their shopping carts, and complete secure transactions with ease. The project focused on implementing robust user management and payment processing systems, while overcoming challenges related to ensuring data security and providing a seamless user experience across different devices.

– PC Monitoring System

The PC Monitoring System is a web-based application designed to streamline the tracking and management of computer assets using QR code technology. Developed with PHP and integrated with a MySQL database, the system allows administrators to efficiently monitor the status and location of PCs within an organization. The primary challenge was to ensure accurate real-time updates and to create a user-friendly interface for both technical and non-technical staff.

⚙ Technical Skills

| 60% Backend Development | 60% Frontend Development | 80% PHP | 70% Python | 70% JavaScript |

🎓 Education

2022

Bachelor of Computer Science (Information Systems)

Universiti Malaysia Sarawak (UNIMAS)

2021

Foundation in Life Science

Universiti Malaysia Sarawak (UNIMAS)

2016
